Global Impact

orange bd

Orange Business Development Limited (Orangebd), founded in 2005, is a next-generation digital transformation company delivering scalable, secure, and future-ready solutions across governments, global institutions, and private sectors worldwide.

Trusted by global organizations such as the World Bank, UNDP, UNOPS, and the EU, and by governments in Bangladesh, the Netherlands, the Philippines, Nepal, and The Gambia, Orangebd operates across diverse cultures, countries, and sectors—building digital systems that work in real-world environments.

With deep expertise across governance, education, media, and judiciary, Orangebd designs integrated, interoperable, and scalable platforms that enable nations and institutions to accelerate digital transformation with confidence.

Driven by experience, strengthened by global standards, and guided by a people-first philosophy, Orangebd creates NextGen digital foundations that scale across borders, sectors, and societies.

A Story of **Transformation**

Orangebd
Built
Belief

In 2005, information was trapped—in print, in filing cabinets, in long queues under the sun. Citizens stood in lines for certificates that could take weeks. Farmers traveled days to submit a single form. Justice moved at the pace of paper. In a world running on files, people were invisible.

Orange Business Development Ltd. did not start as a technology company. It started as a **problem-solver.**

Its first act was not to code, but to **liberate.** When newspapers were the primary source of truth, Orangebd transformed them into e-Newspapers—bringing news online, making it accessible, searchable, alive. That was the first signal: if information could be set free, so could services.

So could governance. So could trust.

Digital Government Transformation Project (DGTP)

Design and development of selected e-services via multiple channels including an online portal; implementation of interoperability platform with 6 key registries

NRPB

Netherlands Digital Government Transformation Project

One Portal
All Services

Citizens will access key services through a unified online portal ending the need to navigate multiple offices.

Access Points
- WEB
- APP
- KIOSK
- DIGITAL CENTRE

- Sole Proprietorship Registration
- Civil Registry Certificates
- National ID Issuance & Renewal
- Driver's License Issuance & Renewal
- Registration of Vital Life Events (Birth, Death, Marriage, Divorce)
- Business Address Registration

Data Interoperability Platform

Built on Microsoft Azure ecosystem, that encompasses a wide range of tools and services for enabling different data sources and systems to exchange, integrate, use data seamlessly and deliver public services across various governmental SXM institutions

6 Key Registries Connected

Seamlessly integrating the Civil, Business, Land, Taxpayer, Address, and Business License registries to create a single source of truth.

API-First Ecosystem

Secure API catalog and gateway, enabling not just internal government efficiency but also future innovation by vetted third parties (e.g., banks for instant verification).

Azure Ecosystem
with robust security

Automated Workflow Orchestration

Tell Us Once Principle

With the "once-only" principle, citizens and businesses will provide standard information (like address or ID details) just once. The government's systems will securely share it, eliminating repetitive forms.

Predictive Climate Hazard Analytics Platform

From Typhoon Tracking to Community Saving.

Saving Millions of Philippines Citizen by our AI-Powered Disaster Intelligence

Protect your Country

Predictive Climate Hazard Analytics Platform

In a nation struck by an average of 20 tropical cyclones yearly, early warning is not a feature—**it's a lifeline**. For provincial governments in the Philippines, the critical gap wasn't in detecting hazards like typhoons, but in understanding their hyper-local impact: *Which province would be hit by typhoon first? Where should evacuations be prioritized?* Traditional bulletins provided data, but not actionable intelligence.

Orangebd, in partnership with the United Nations Development Programme (UNDP), engineered a definitive solution: the **Typhoon Response Predictive Analytics Application**. This is not a dashboard; it is a mission-critical command center built to achieve a zero-casualty goal.

PHILIPPINES

FROM RUINS TO RESOLUTION

## Technology Healing the Wounds of War

CLAIM PROCESSING INFORMATION SYSTEM (CPIS)

PHILIPPINES

In 2017, the Marawi Siege shattered a city and displaced over 360,000 people. A five-month war left communities in ruins—homes destroyed, lives lost, documents turned to ash. By 2026, the pain was compounded by a broken process: only 10% of claims had been paid. Families waited in temporary shelters, caught between loss and bureaucracy, between memory and paperwork.

360,000+
DISPLACED RESIDENTS
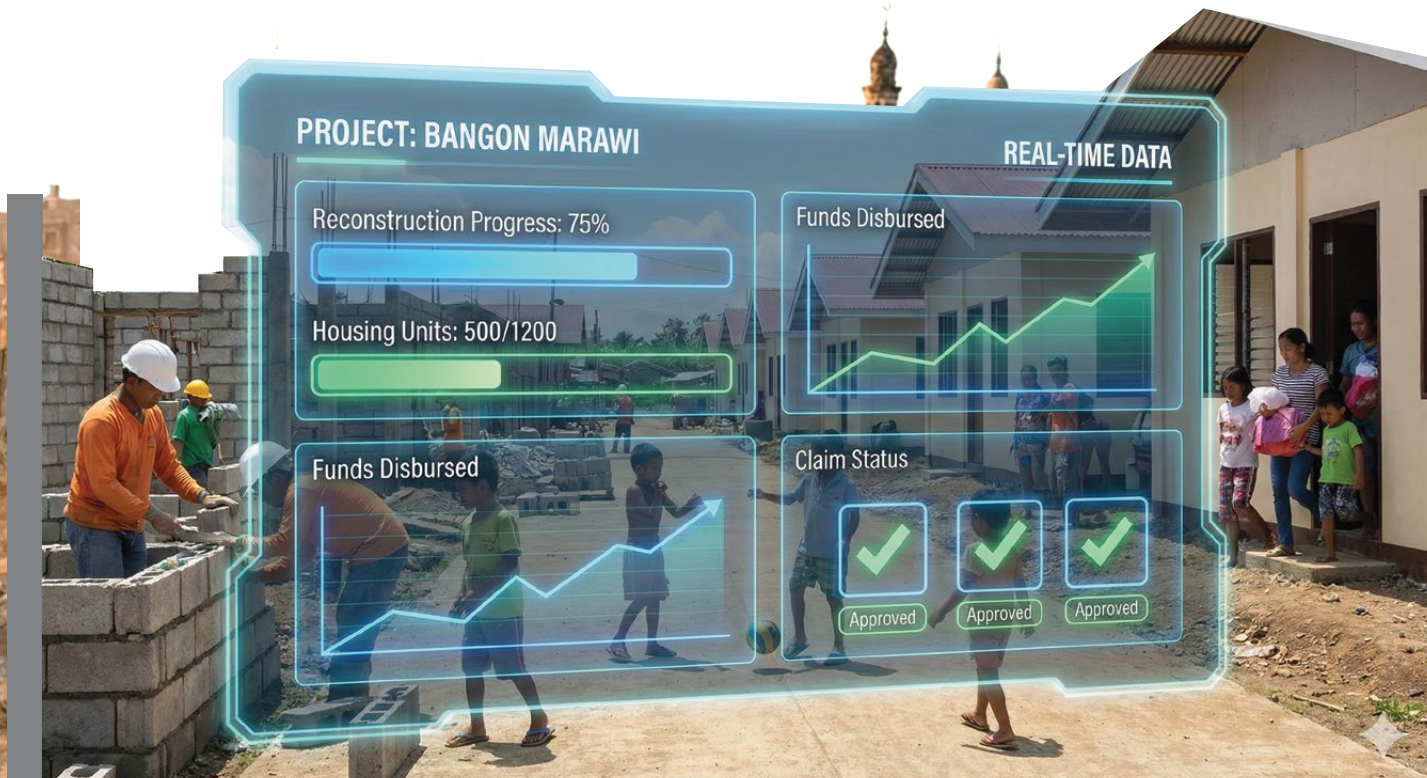

17+Billion
Property Damaged

14,495
Total Claims

CLAIM PROCESSING INFORMATION SYSTEM (CPIS)

We deliver technology that serves humanity—turning complex, painful processes into pathways of hope and resolution.

Introducing **CPIS – The Claims Processing Information System**:
Awarded to OrangeBD, CPIS is more than software—it's a digital bridge to justice. Designed for the Marawi Compensation Board, this end-to-end platform transforms chaos into clarity, delay into delivery, and despair into dignity.
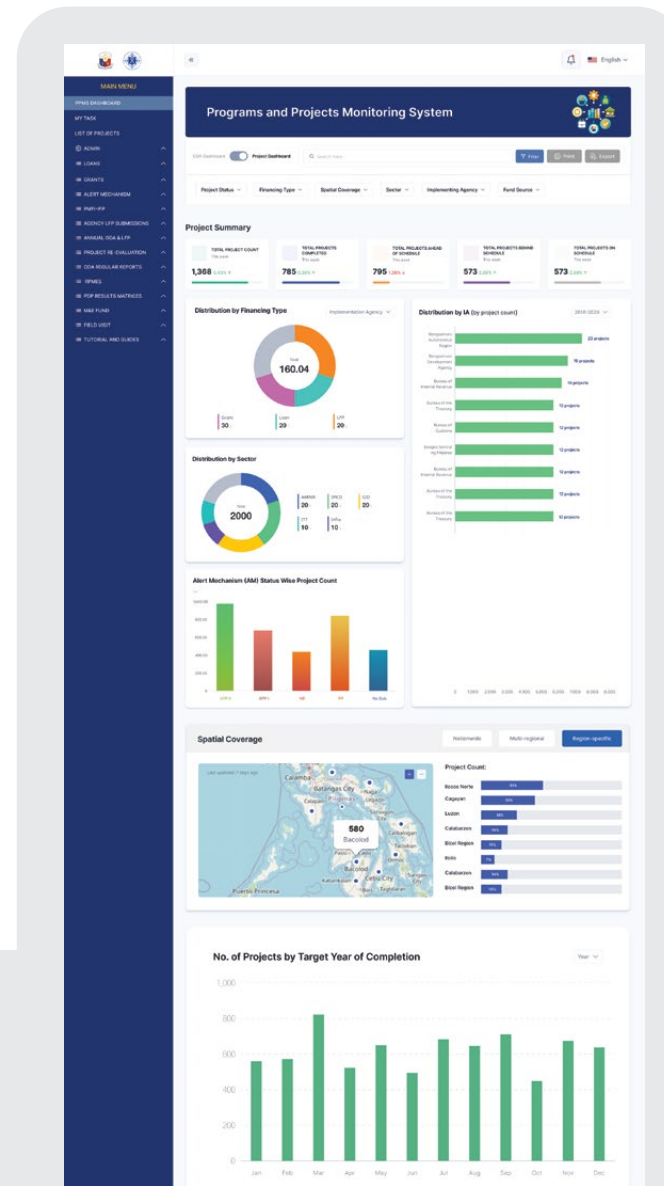

✅ **Digital Docketing & Document Management**
Lost papers are replaced with secure, scanned, retrievable digital records.

✅ **Transparent Workflow Tracking**
From claim submission to payment—every step is visible, accountable, and traceable.

✅ **Role-Based Access & Secure Data Handling**
MCB officials, evaluators, finance teams, and claimants interact through one integrated, secure platform.

✅ **Real-Time Dashboards & Reporting**
Decision-makers gain insights at a glance—monitoring progress, bottlenecks, and impact.

✅ **Automated Notifications & Updates**
Claimants receive SMS/email alerts—no more silence, no more uncertainty.

## PHILIPPINES

Government of Nepal

Nepal's Digital Leap in Waste Management

Transforming Trash into Treasure

In Nepal, plastic waste isn't just an environmental challenge—it's a missed opportunity. Thousands of tons of recyclable plastic were being lost to landfills or the environment because the system was manual, fragmented, and invisible to decision-makers.

Circular Economy

Sustainiliby

Nepal's Digital Leap
in Waste Management

Orangebd, in partnership with the United Nations Development Programme (UNDP), changed the narrative. Awarded by the Government of Nepal, we designed and deployed a **Unified Integrated Plastic Waste Management Database System**—turning scattered data into a strategic tool for a circular economy.

In 2008, we created BDlaws, the first comprehensive digital indexing of Bangladesh's laws and codes. This wasn't just a database; it was the foundation of transparent, accessible justice.

Orangebd doesn't just build judicial software—we engineer justice ecosystems. Starting with the fundamental digitization of laws, we've evolved into architects of complete digital justice infrastructure. Our platforms handle everything from high-court case management to citizen inheritance calculations, from virtual bail hearings to human rights case tracking.

Transforming Document Legalization with Secure, Fast, and Verifiable e-Apostille System

I am Verified
Ready to Study Abroad

An Apostille is an authentication certificate that certifies public documents such as Birth Certificates, Academic Records for use abroad in countries that are members of the 1961 Hague Apostille Convention.

After joining the Hague Apostille Convention, Bangladesh needed a secure digital system to issue and verify Apostille certificates.

The e-Apostille system automates the entire process—submission, verification, attestation, & certificate issuance—ensuring compliance, faster service, and greater transparency and security.

e-Apostille

Till January 18, 2026

Orangebd turned a slow, paper-based process into a fast, digital one. The e-Apostille System is the Government of Bangladesh's official online platform to certify your public documents (like birth certificates, educational certificates, police clearance and marriage papers) so they are legally **recognized** in over **127 countries.**

e-Apostille

Stakeholder of e-Apostille System

- All Education Boards
- Technical and Madrasa Education Board
- Public and Private Universities
- University Grants Commission
- Ministry of Education
- Ministry of Law
- Ministry of Health and Family Welfare
- Ministry of Foreign Affairs

Step-by-Step Process

Step 01 — Document Submission
Applicant submits a public document online (e.g., via MyGov in Bangladesh).

Step 02 — Verification & Attestation
The Ministry of Foreign Affairs (MoFA) verifies the authenticity of the document before approving it for Apostille issuance.

Step 03 — e-Apostille Issuance
A digital certificate is generated and signed electronically.

Step 04 — Delivery & Verification
The applicant can download the e-Apostille or receive it via SMS or email. Recipients scan the QR code to confirm its validity.

The Problem | Our Solution

The Digital Backbone of Bangladesh's Quality

e-Application Management System

6 Core Wings Automated:

Certification Marks, Metrology, Management System Certification, Standards, Laboratories, Admin Services.

27 End-to-End Digital Services

Licensing, renewals, lab testing, inspections, payments, HR, and case management.

Nationwide Deployment

Used across BSTI's regional and district offices, creating one standard of service for all.

200,000+ Annual Applications
streamlined through a single platform

23 Regional Offices Connected

The Bangladesh Standards and Testing Institution (BSTI) is the guardian of national quality—ensuring everything from food safety to industrial products meets rigorous standards. Yet, its processes were manual, paper-heavy, and slow. Citizens and businesses faced long waits, opaque tracking, and physical visits for certifications that should inspire confidence.

Orangebd transformed BSTI into a fully digital, transparent, and citizen-first institution. We built a **unified web-based automation system that digitizes the entire certification ecosystem**—from application to inspection to digital certificate issuance.

e-News Building CMS

Our Newspaper CMS is not an experiment—it is a battle-tested platform, refined over years of real newsroom operations

Challenge

When News Was Bound by Paper In the early 2000s, newspapers were read in print. Access depended on physical reach and circulation.

A **Vision Ahead** of Its Time

In 2005, while print media still dominated, Orangebd foresaw a digital future for news. Before sustainability became a global priority, we pioneered an e-Newspaper CMS that transformed journalism in Bangladesh—making news instant, accessible, and paperless.

Empowering the Future of **Journalism**

During this period, our solution was widely adopted across the news media sector. Local, regional, national, and global publications embraced the platform.

This adoption empowered organizations to scale, modernize, and expand their reach.

Transformed **70+** News paper

the Impact.

orange bd

A diverse team of thinkers, builders, and
leaders driving transformation across sectors
and borders.

#InnovateWithOrangebd nextGen | Scalable | Global

For 20 years, we have moved from digitizing newspapers to architecting national platforms.

We have turned manual processes into seamless journeys, siloed ministries into connected ecosystems, reactive governments into anticipatory partners.

We do not build apps. We build **public infrastructure.**

We do not measure success in revenue. We measure it in **citizens served, seconds saved, trust earned.**

The future is not about more technology. It is about **better systems**—systems that scale, systems that include, systems that last.

We believe that technology should not complicate—it should

liberate.
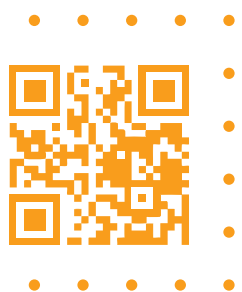

We believe that governance should not obscure—it should

empower.

We believe that systems should not exclude—they should

include.

We are **Orangebd**.
We build the next generation of digital nations.
